

Index	Assessment Area	Measure	Definition	Output	Methodology	Reasoning	Consultation questions
2.8.1	Data Completeness	Humanitarian	Assess the proportion of humanitarian activities or activities that contain at least one humanitarian transaction within an organisation's publishing. Only activities published at v2.02+ will be included	Percentage	Count number of active activities which have either: - activity level humanitarian flag set to 1/true - at least one transaction level humanitarian flag set to 1/true Divided by total number of active activities. Note Use of OECD DAC humanitarian sector codes will not be counted.	This measure assesses the importance of identifying humanitarian data for our humanitarian data users. It aims to assess the extent to which IATI publishers are reporting on humanitarian activities. This is important because IATI data is recognised as one of the key platforms for accessing timely and open data on humanitarian assistance
